ETERNALIZE LOVE AT THE BEST PRICE, WORLDWIDE

Ever Dear

Diamonds are forever, love never dies
The EverDear & Co. Cremation Diamond is the ultimate cremation jewelry, infused with the memory of your loved one. Produced from carbon extracted from ashes or hair, it provides years of comfort and remembrance. Now, that special person can be with you always, wherever you are in the world.

Our scientists share the ultimate mission of making cremation diamonds universally recognised and affordable to all.

As a U.S. based cremation diamond company that serves customers worldwide, EverDear & Co. invests in both the market promotion and technical improvement of cremation diamonds. We wish to see families feel comforted by their new cremation diamonds. Their touching stories encourage and inspire us to constantly improve our technology and services.

“Always Remember an Eternity of Love”
WHAT IS A CREMATION DIAMOND?

Perhaps it was their touch? Maybe it was their smile? All you know is that whenever they were there you knew that you were loved. How can you measure thousands of memories of love? In daylight? In miles? In laughter? With all those memories, you know that your love has endured for a lifetime, a lifetime of love.

The EverDear & Co. Cremation Diamond is the memory of a loved one given true form. Created from ashes, the Cremation Diamond provides an eternity of comfort and remembrance. Now, your loved one can be with you always, wherever you are.

With a cremation diamond, you can remember those who are most important to you; be it a departed loved one, a newborn child, a beloved pet, or your dearest spouse.
In EverDear & Co. laboratories, hair is processed by heat in a vacuum environment, and ashes are purified by hand through a refinement process. The carbon content in everyone’s hair or ashes is different, so the process and results are unique for each order.

**CARBON REFINEMENT**

Natural diamonds are formed in underground High Pressure and High Temperature (HPHT) environments. A High Pressure, High Temperature press is used to simulate a natural environment for turning the carbon into a cremation diamond. A cremation diamond grows in the environment and starts to grow like a shining star.

**DIAMOND FORMATION**

We, at EverDear & Co., do all our research and scientific experiments in-house. These research projects help us to improve diamond quality & stability and enable us to personalize cremation diamonds in a shorter time frame and at a lower cost.

**COMMITMENT TO INNOVATION**

EverDear & Co. values research and development (R&D) and recognizes the importance of intellectual property protection. The detailed technical process and its applications are strictly safeguarded and maintained in absolute confidentiality.
Certificates

International Gemological Institute (IGI)

The International Gemological Institute (IGI), founded in 1975 and headquartered in Antwerp, is a diamond, coloured stone, and jewelry certification organization. IGI has offices in New York City, Hong Kong, Mumbai, Bangkok, Tokyo, Dubai, Tel Aviv, Toronto, Los Angeles, Kolkata, New Delhi, Surat, Chennai, Thrisur, Ahmedabad, Shanghai, and Cavalese.

Gemological Institute of America (GIA)

The Gemological Institute of America (GIA), founded in 1931 and headquartered in California, is a non-profit institute dedicated to research and education in the field of gemology, which sets and maintains the standards used to evaluate gemstone quality. The GIA has offices in 13 countries, with 11 education campuses, 9 laboratories, and 4 research centres around the globe.

Cremation Diamond 4Cs

Colour, Cut, Clarity, and Carat Weight

Colour

Affected by the individual elements inside each ordered diamond, the colour of every EverDear & Co. diamond is unique. These colours fall mostly between Fancy Light to Fancy Vivid.

EverDear & Co. does not add additional elements during the production process, making your diamonds more natural and unique.

Cut

The cut of a diamond determines its brilliance and sparkle.

The round brilliant cut with 58 facets is the most dazzling shape of all. This cut also retains the maximum size of your cremation diamond.

That’s why round brilliant cut is recommended by our experts.

Clarity

Most EverDear & Co. cremation diamonds are “VS” or “VVS” grade (Very, Very Slightly Included). This means no internal inclusions can be seen without the help of a magnification lens. Larger sizes may have more inclusions, however.

Carat Weight

As size increases, the price of a diamond increases sharply. A 1 carat diamond has 3 to 5 times of value of a half-carat diamond in today’s market.

Different from on-stock mined diamonds, the exact size of a cremation diamond cannot be pre-determined. The given timeframe for creation provides cremation diamonds a size range, but the final size may vary individually. This is the reason why cremation diamonds are priced by carat range instead of exact size.

All EverDear & Co.’s cremation diamonds can be certified as genuine lab-grown diamonds by any third party independent organization.

EverDear & Co. diamond is unique in color.

A blue diamond invokes thoughts of peace and tranquility. Blue diamonds are blue due to purification to remove the Nitrogen from the ashes leaving only Boron. Boron is an element only created in stars. Thus, in a blue diamond, your diamond is not only in remembrance of your loved ones but it is also a piece of Heaven. They are at peace and they will always be with you.

Promotions

The order has to be from the same ashes.

To provide every customer the best price at the most, EverDear & Co. also offers considerable discounts for multiple diamonds from same order:

- Two diamonds or more in different kind. 5% discount
- Three diamonds of the same kind. 8% discount
- Four diamonds or more of the same kind. 10% discount

Purity, that is the word to describe our colorless diamonds. To make colorless diamonds, the carbon has been purified of all other elements from the ashes. When you remember your loved one, know that they have been born again as something pure, beautiful, and eternal. Long after time goes on, their memory will endure as this colorless diamond.

Order Now

EverDear & Co. also offers GIA certification, customized laser inscription, and personalized jewelry services. These are optional services at an additional fee. Prices do not include VAT.

With a hue reminiscent of the glow of sunshine on a summer afternoon, yellow diamonds are the most natural color for diamonds made from ashes. Yellow diamonds are the most popular option as they are closest to the actual chemical composition of the ashes. If you want the diamond to be the most natural and closest it can be to your loved one, a yellow diamond is the best choice for you.

What separates our cremation diamond ring from the rest?

There’s always the classic solitaire diamond with 4 prongs, and if the mission is to dazzle and impress, a halo or pave setting will most likely satiate your desires. But when it comes to commemoration, the cremation diamond ring is without equal. Our single diamond approach lends focus and dedication to the memory of your beloved. The result is a refined and exquisite cremation diamond ring that will stand the test of time and hold part of your loved one forever.

Cremation Earrings

Nothing quite matches the grace of our cremation diamond earrings. Numerous designs of diamonds earrings look great, but they don’t offer the elemental emotional affections as cremation diamonds earrings possess. Some settings go over the top, with a multitude of gemstones that dazzle and shine. EverDear & Co.’s design is clean – a tasteful setting adorned by a single diamond. Ornate jewelry has its place, but when it comes to the remembrance of your beloved, it’s hard to beat the focus and charm of our cremation diamond earrings.

Please explore http://everdear.co/cremation-diamonds-from-ashes/jewelry-rings/ for our full selection.

Cremation Bracelets

You will fall in love with the elegance of our cremation diamond bracelet. Typical bracelets, such as pave setting pieces, contain numerous gemstones. A traditional example is the tennis diamond bracelet, which consists of a row of matched diamonds. While beautiful, this can be a very expensive option and does not offer the dedicated focus of an individual diamond. What sets us apart is our use of a single, single gemstone design. The cremation diamond bracelet highlights the ash diamonds in its purest form, a fitting tribute to the individuality of your loved one.

AUTHENTICITY GUARANTEE

EverDear & Co. will issue a certificate of authenticity with your final product to guarantee:
- Carbon source of the diamond
- Diamonds 4Cs grading
- Jewelry setting metal

EverDear & Co. provides a certificate of authenticity with every diamond we sell. We want you to treasure your cremation jewelry with peace of mind, and never have to wonder about its authenticity.

Why are we best price?

The value behind

Our product is a genuine diamond with invaluable meaning and essence from your beloved. Our diamonds are produced and graded by our experts using the world’s most advanced technology.
- Genuine Diamonds Graded by GIA
- Exceptional Brilliance from your Loved One
- Unique and Beautiful Colours with Jewelry Fittings

Why we are such good value-for-money

Brand New Technology
Our new innovative US technology creates diamonds at a much cheaper cost. The size of our HPHT presses is 1/3 that of a Russian press but provides 1000°C higher temperatures and 50 kbar higher pressures.

Direct Sales
EverDear & Co. does not sell via agents or distributors, which saves you from paying commission.
I just want to say thank you Everdear & Co. My family and I have been struggling ever since our dearest son passed away. Knowing that he is still with us, transformed into a diamond, was the comfort that we needed. Thank you, Everdear & Co., for being with us through this difficult period every step of the way.

Jerry R.

My wife and I were together for 30 years. It was only through Everdear & Co. that I was able to remember Angie the way she deserved to be. Thank you for helping me through this Everdear & Co.

Brad P.

Thank you so much Everdear & Co. Rocky was my best friend and the best dog a guy could ask for. He and I basically grew up together and we were inseparable. Wherever I went, he came with me. Now, he’ll always be with me as a beautiful blue diamond.

John C.

Hi Everdear & Co. My wife and I would just like to thank you for these beautiful diamonds you guys made. What better way to be together forever than to have two diamonds made from our hair. The diamonds turned out more perfect than we could have imagined. Thank you so much!

Michael A.

Thank you Everdear & Co. The diamond is so beautiful. Seeing this diamond I know that mom would have been pleased if she could see what she looks like now.

Mary V.

Order Instructions

Choose diamonds and jewelry design and pay a 50% deposit.

Send the ashes and hair to our office.

Our lab transforms the ashes and hair into your diamond.

Diamond certification and jewelry setting.

Delivery after full payment.
